# Homework 1 for B130P16, 2023
## (Practical basics of scientific work)

**Perform a bibliographic search using WOS, SCOPUS or Pubmed database.**

**Select from these three topics:**

**1)** The principle of viral infection with COVID-19 in humans.

**2)** What is AlphaFold tool and how it helps biologists to study protein structures.

**3)** CRISPR/Cas9 and genome editing.

Use **suitable keywords** to find **at least 10** the most relevant references.

Save these references into your **personal database (Zotero, Mendeley, EndNote, etc.).**

**Using text editor,** write **10-15 short sentences on the topic**, **insert in text citations** into the text and **generate bibliography** at the end of the text. Use one of these three citation and bibliography styles: Springer-basic, Nature or Scientific Reports.

Name the file with **your name**, and save it to the shared folder:
